

Module 03 Information Server Deployment Options and Installation Overview

IBM InfoSphere Information Server for Data Integration

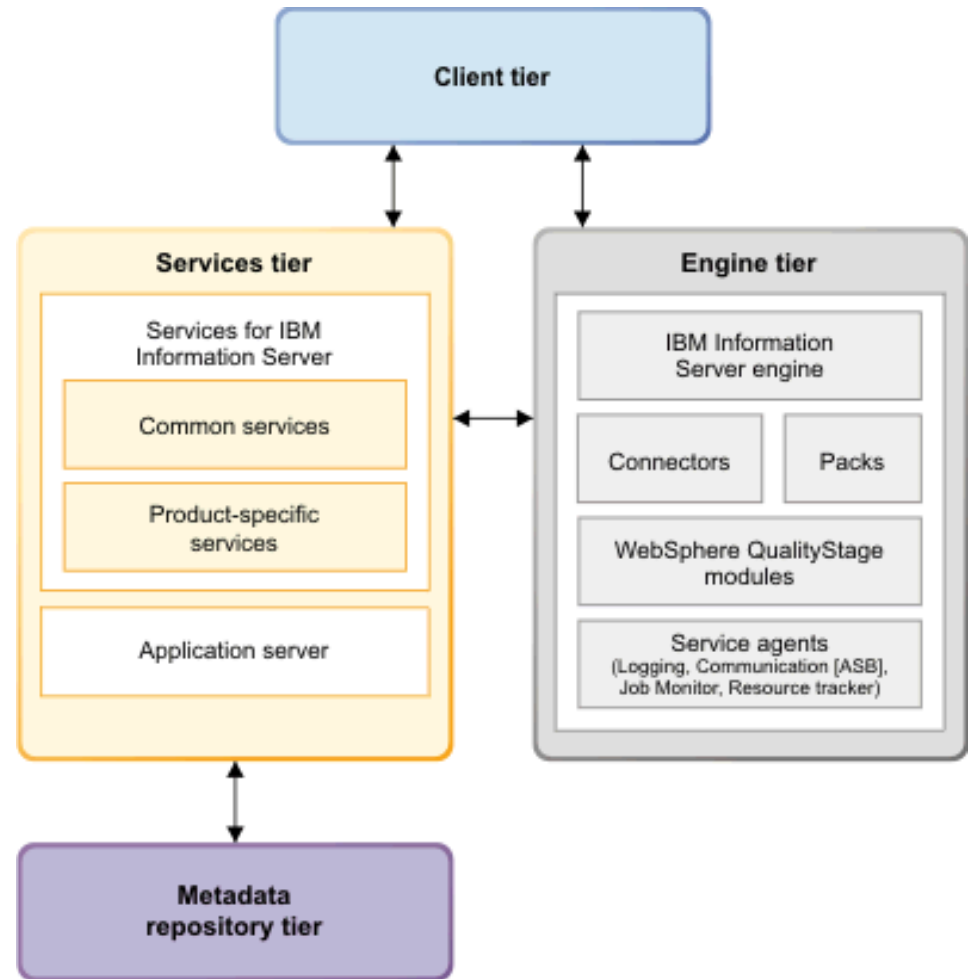

Module Objectives

After completing this topic, you should be able to:

- Understand and identify installation tiers of Information Server
- Describe the deployment options
- Understand Information Server for Data Integration installation procedures

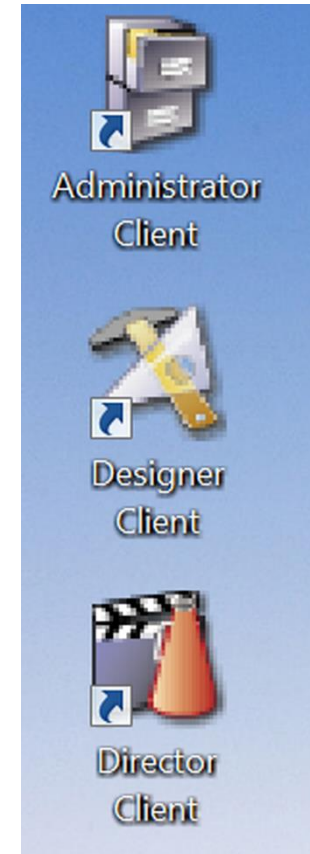

Information Server Tiers and Components

- **Client:** DataStage and Information Server clients
- **Engine:** DataStage engine and other components
- **Services:** Hosts common and product-specific services
- **Repository:** Database server and database
- Documentation

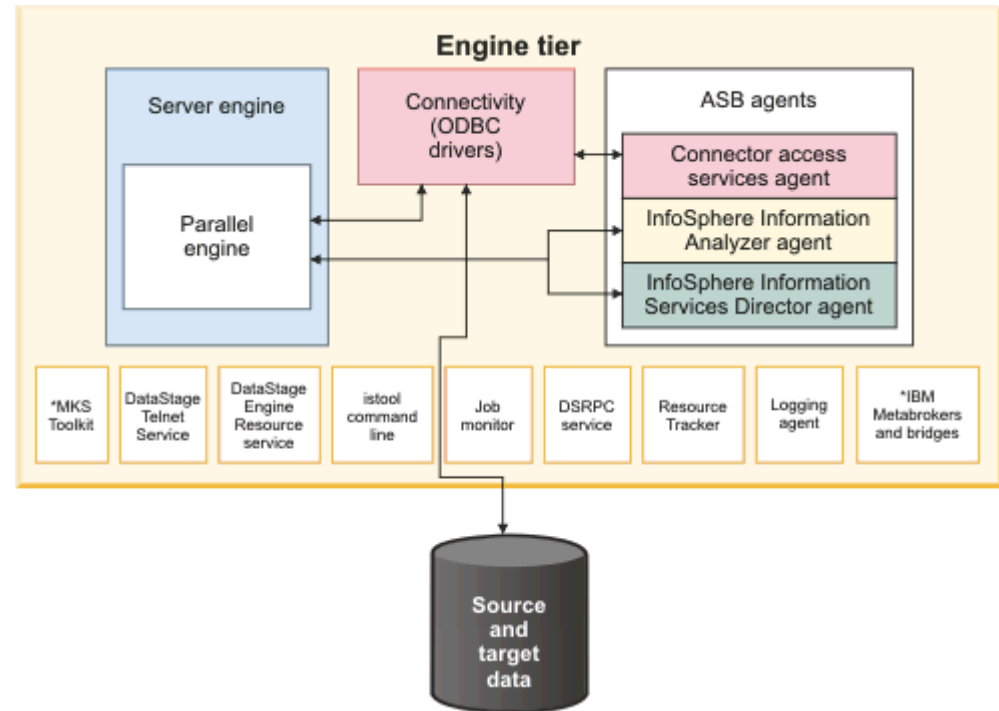

DataStage Client Tier

- DataStage Administrator
 - Administers DataStage projects and conducts housekeeping on the server
- DataStage Designer
 - Creates DataStage jobs that are compiled into executable programs
- DataStage Director
 - Runs and monitors the DataStage jobs

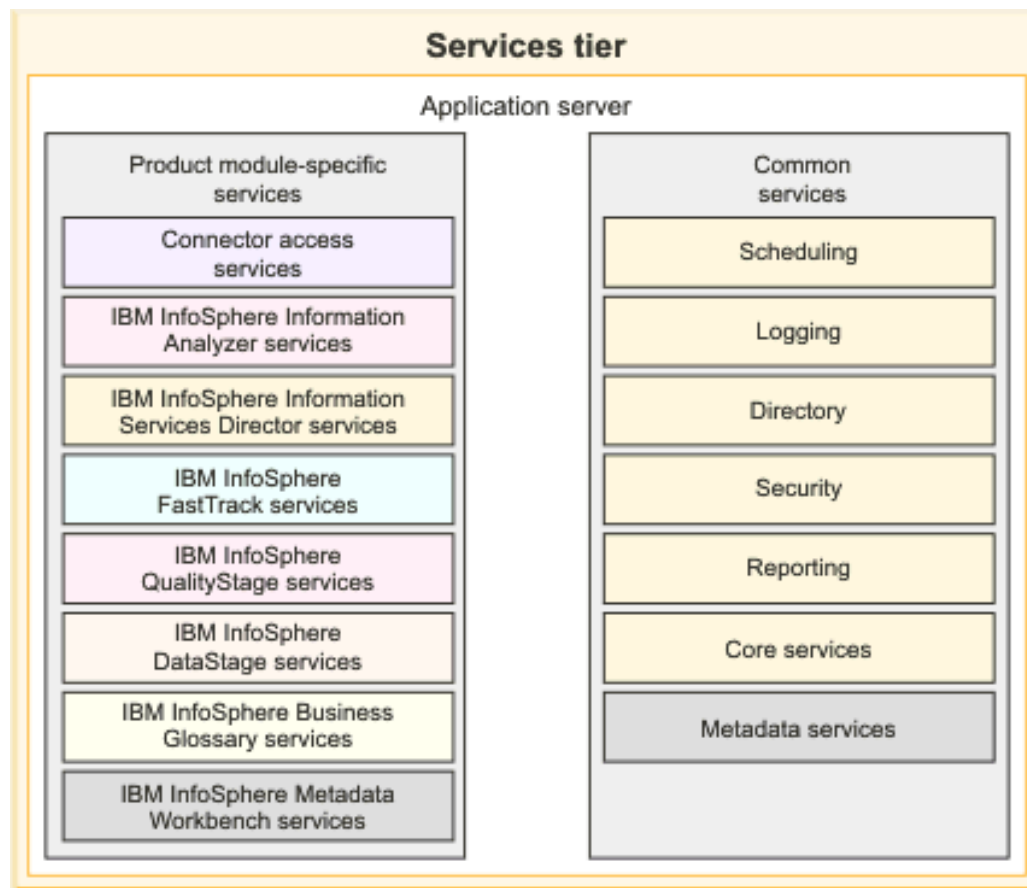

Engine Tier

- Runs jobs to extract, transform, load, and standardize data
- Runs parallel, server, and sequencer jobs
- Service Agents
- Connectors and Packs

Services Tier

- Includes WebSphere Application Server
- Services for IBM Information Server (both common and product-specific services)
- Information center documentation

Metadata Repository Tier

- Contains metadata for IBM Information Server and each of its product components
- Enables suite components to share information throughout the data integration lifecycle
- Platforms
 - DB2 Enterprise Server Edition
 - Oracle 11g above
 - Microsoft® SQL Server
- If DB2 is used, you can install it with the suite installation wizard, or you can specify an existing instance
- If Oracle or Microsoft SQL Server used, you must run scripts to configure the metadata repository before you install the suite

Databases

Filter

Prerequisite	Version	Prerequisite Minimum	Product Minimum	Components	Operating System Restrictions?	Notes	Details
DB2 Enterprise Server Edition	10.5 and future fix packs	10.5	11.5		No	No	View
Microsoft SQL Server Enterprise Edition	2014 and future fix packs	2014	11.5		No	No	View
Oracle Database 11g Enterprise Edition	Release 2	Release 2 11.2.0.1	11.5		No	(1)	View
Oracle Database 12c Release 1	(12.1.0.0.0) Enterprise Edition	(12.1.0.1.0) Enterprise Edition	11.5		No	(2)	View
Oracle Real Application Clusters	(Oracle 11g Release 2) and future fix packs	(Oracle 11g Release 2)	11.5		No	(2)	View
	(Oracle 12c Release 1) and future fix packs	(Oracle 12c Release 1)	11.5		No	(2)	View

▼ Footnotes

- (1) Oracle ASM is supported.
See technotes for installation guidance.

[↑ Show in context](#)

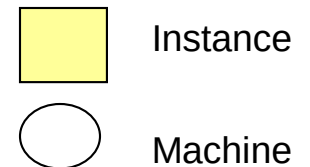

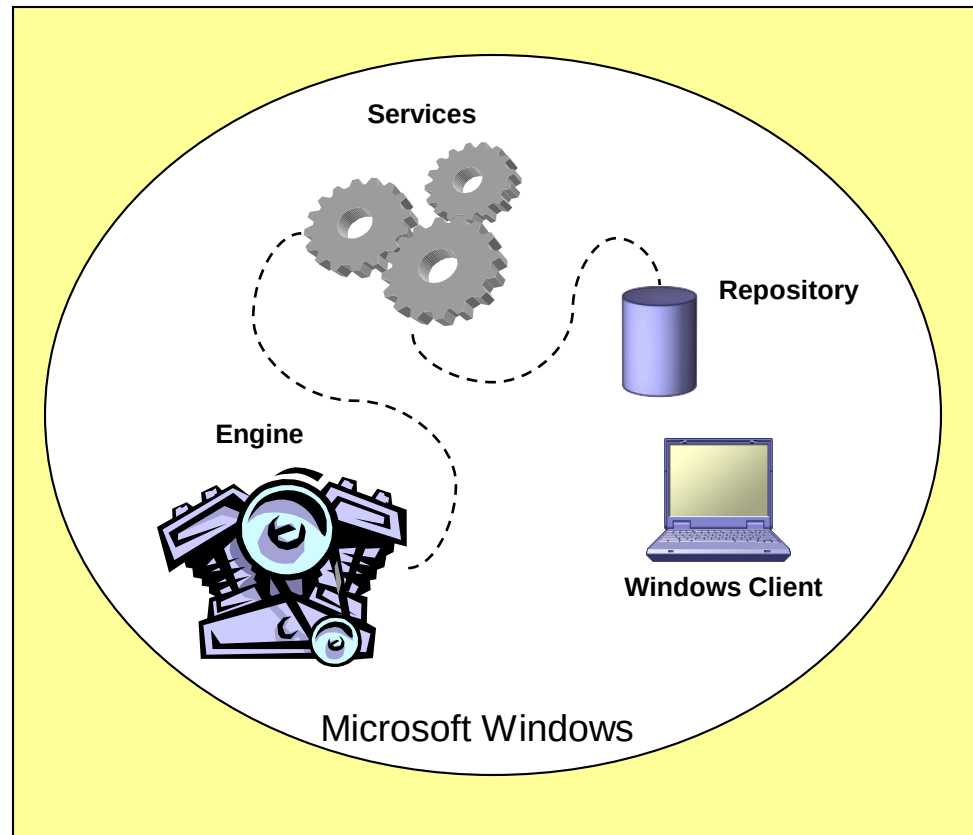

Oracle Pluggable Databases is not supported

- (2) Oracle ASM is supported.
See technotes for installation guidance.

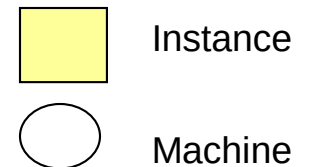

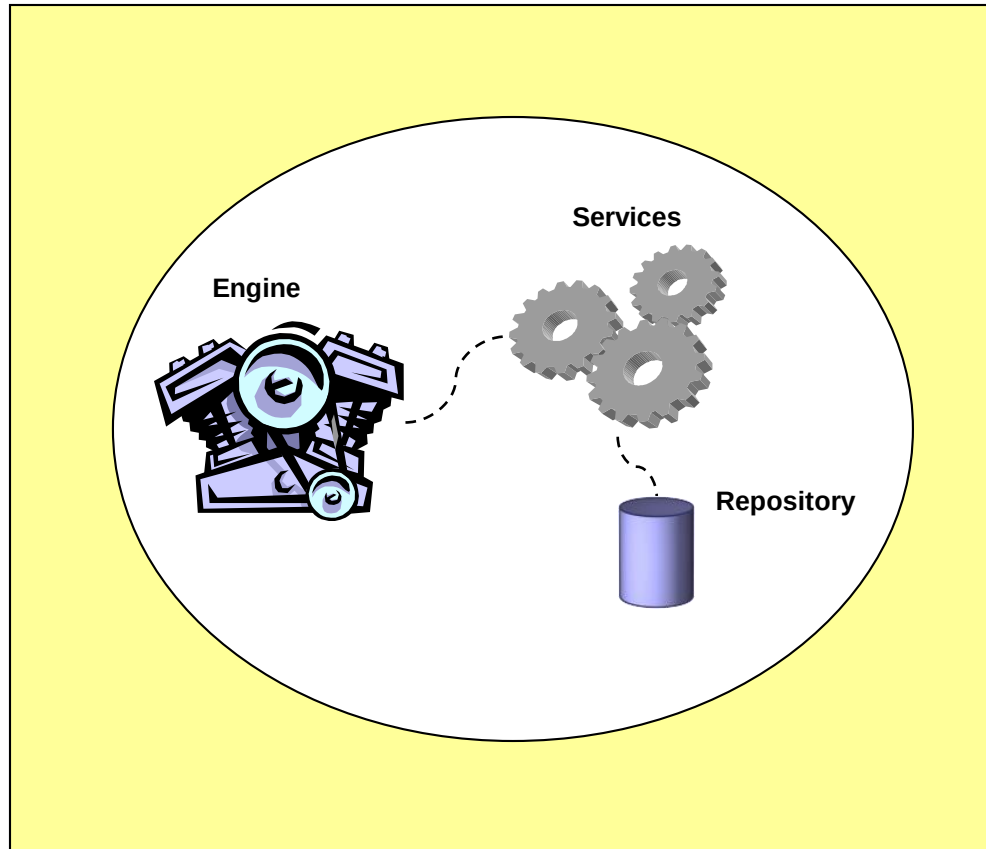

[↑ Show in context](#)

Oracle Pluggable Databases is not supported

Deployment Options - Single computer topology

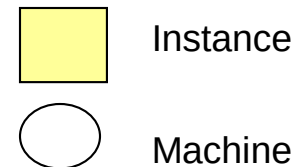

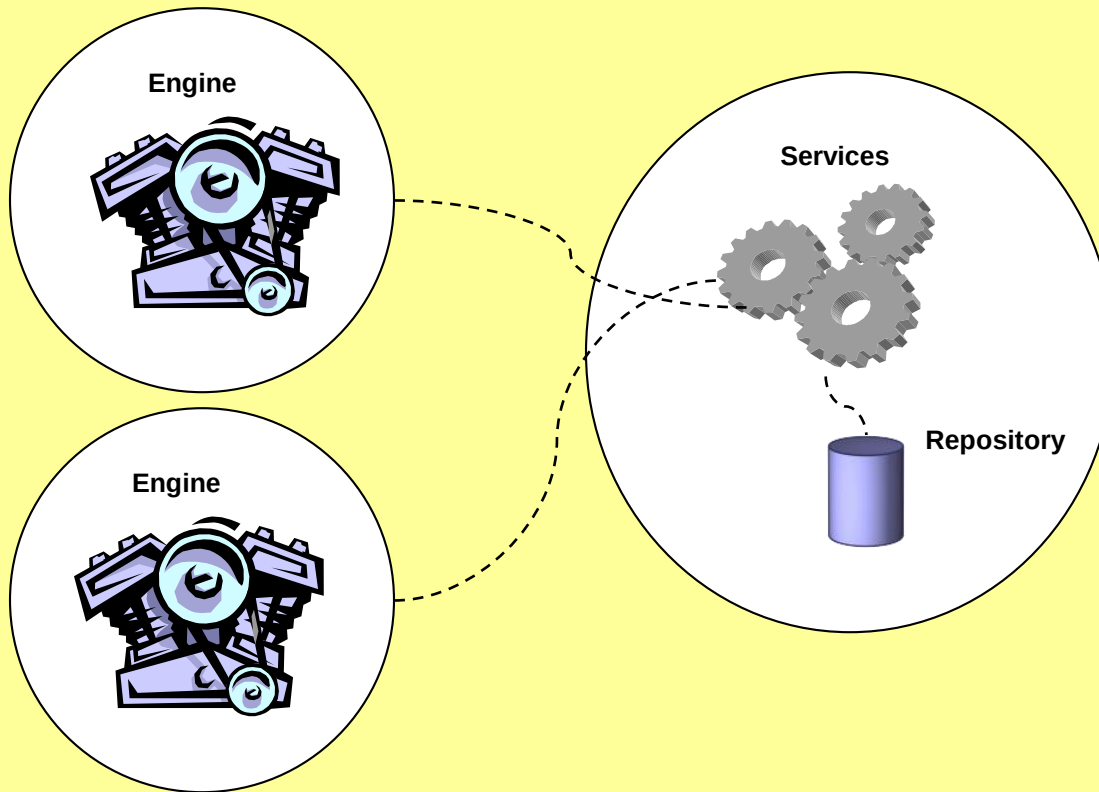

Deployment Options - Client / Server topology

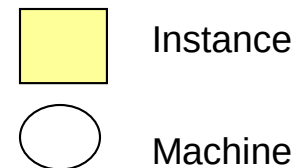

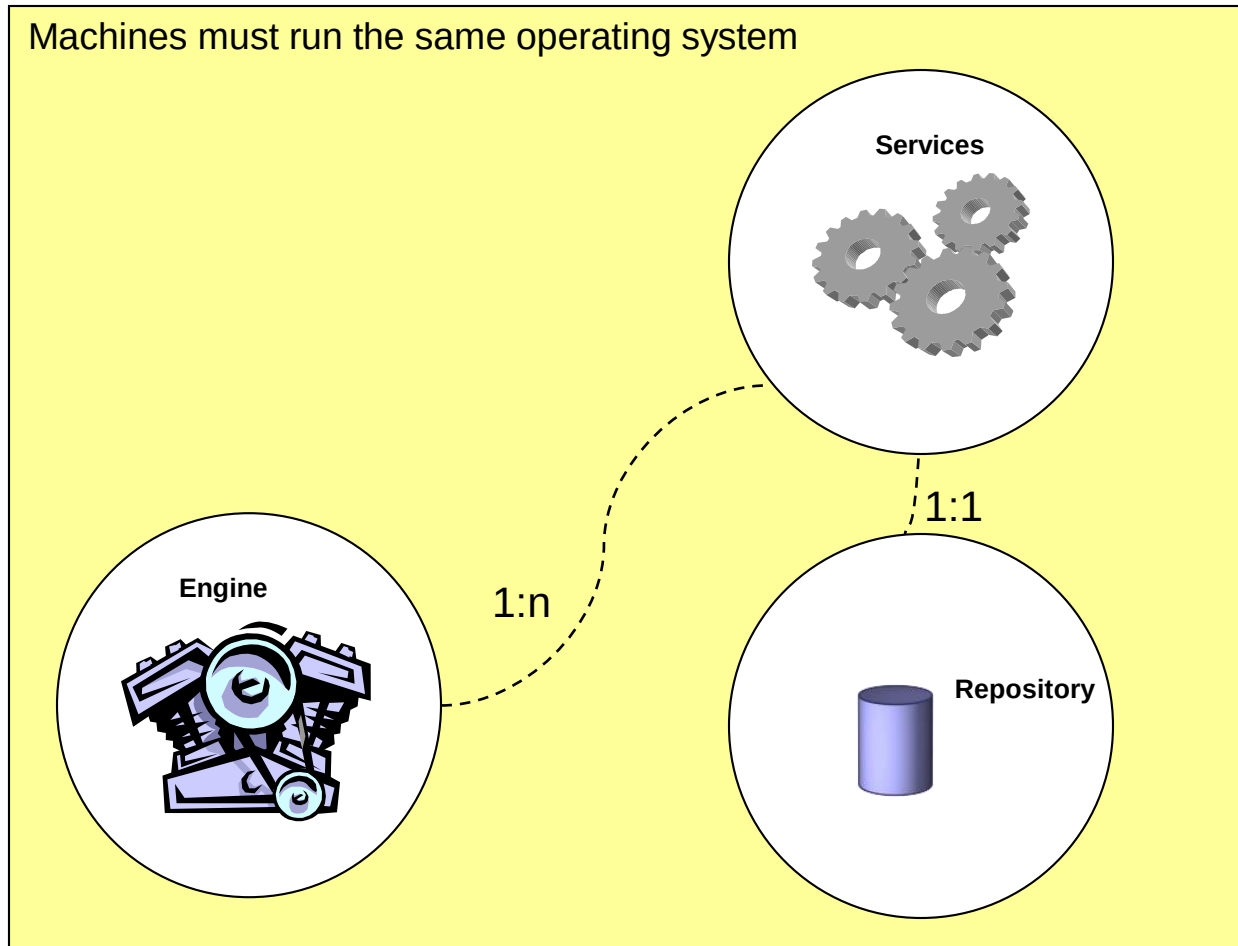

Deployment Options – Multi-engine tier topology

Machines must run the same operating system

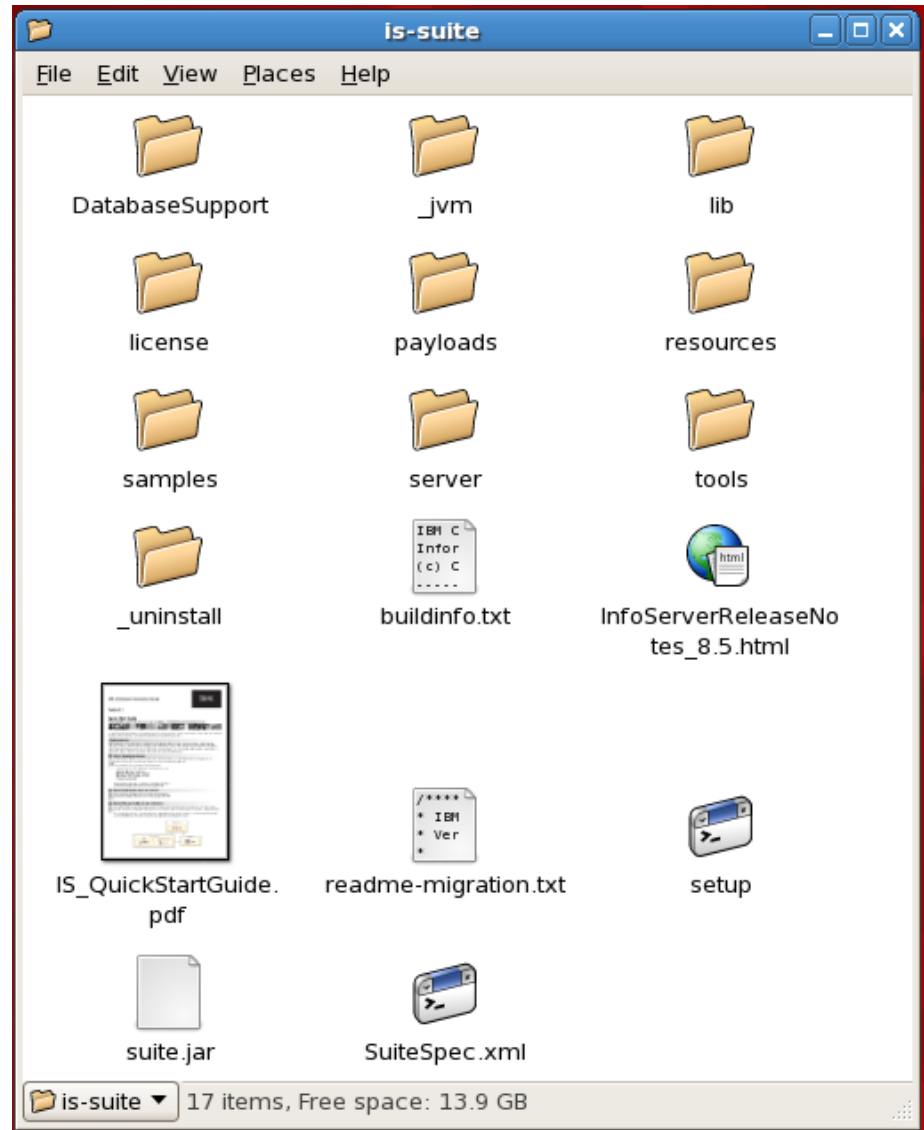

Deployment Options – Dedicated tiers topology

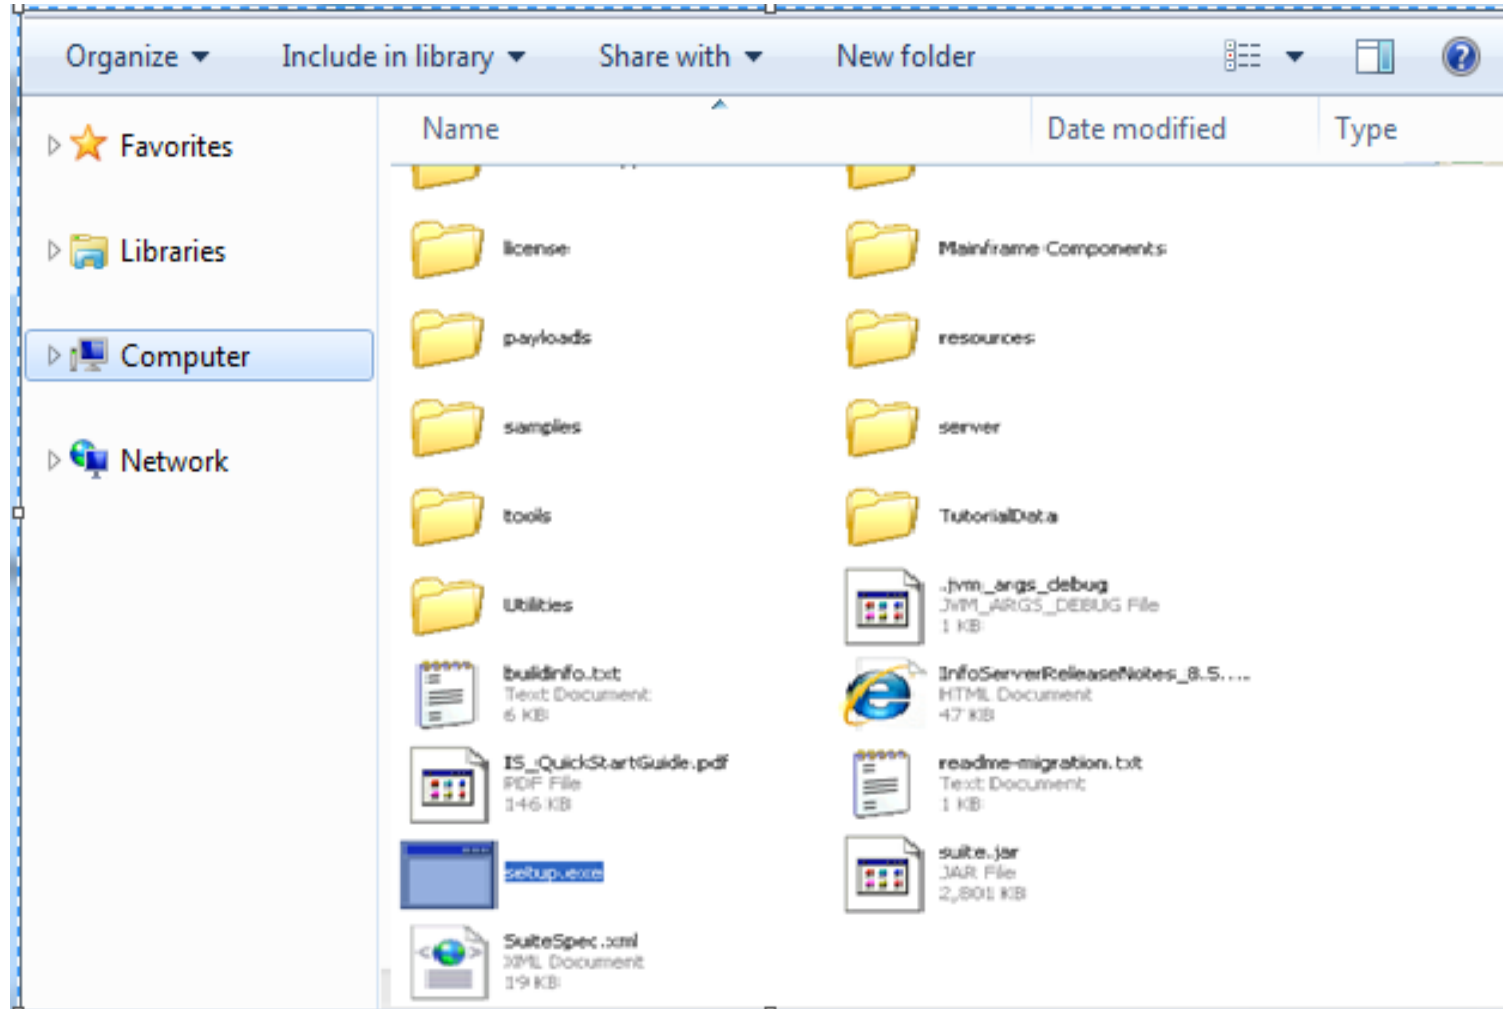

IS – DataStage Installation - Linux

- In the directory *is-suite* of the installation media, locate the *setup* executable
- Open a terminal window, change directory to *is-suite*
- Type *./setup* then follow the instructions on the screen

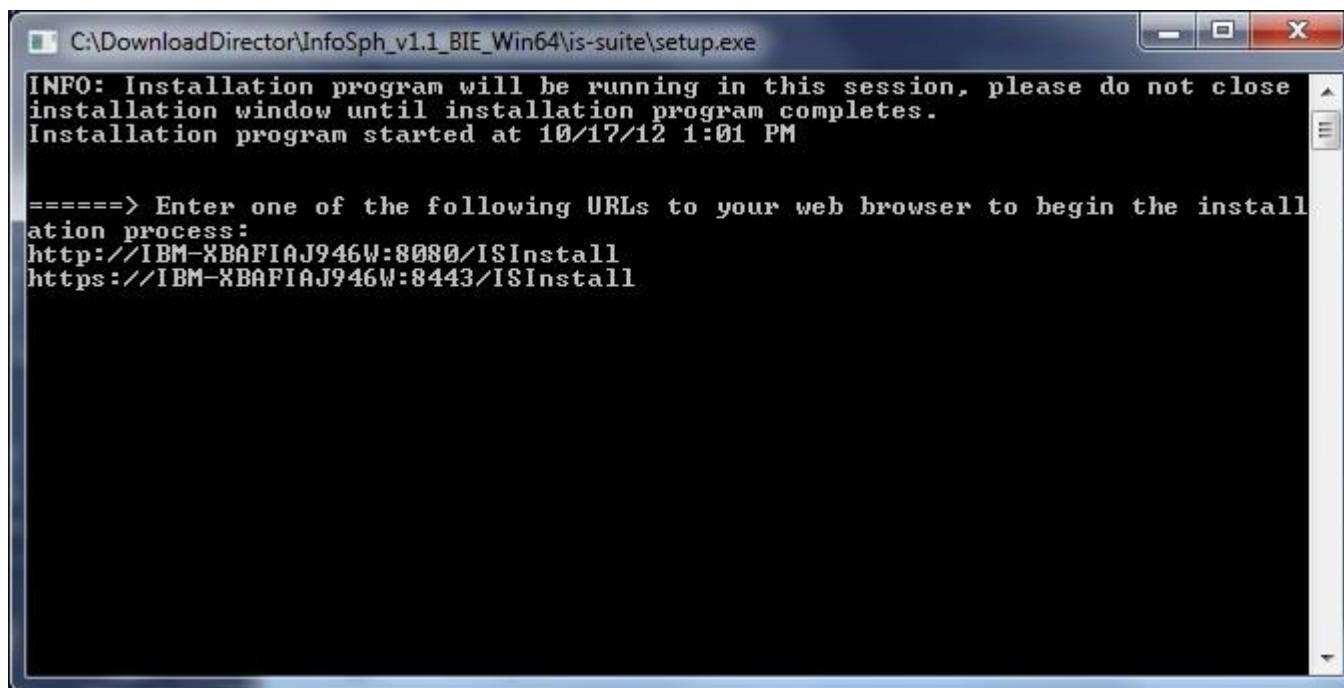

IS – DataStage Installation - Windows

IS – DataStage Installation

- When prompted to enter one of the following installation URLs, open Firefox and enter either one of the URL given on the setup screen
- URL has the format: `http://<hostname>:<port number>/ISInstall`
- If Information Server is installed on Windows Server, IE will be started automatically with the URL
- The installation program will start in a moment within the browser

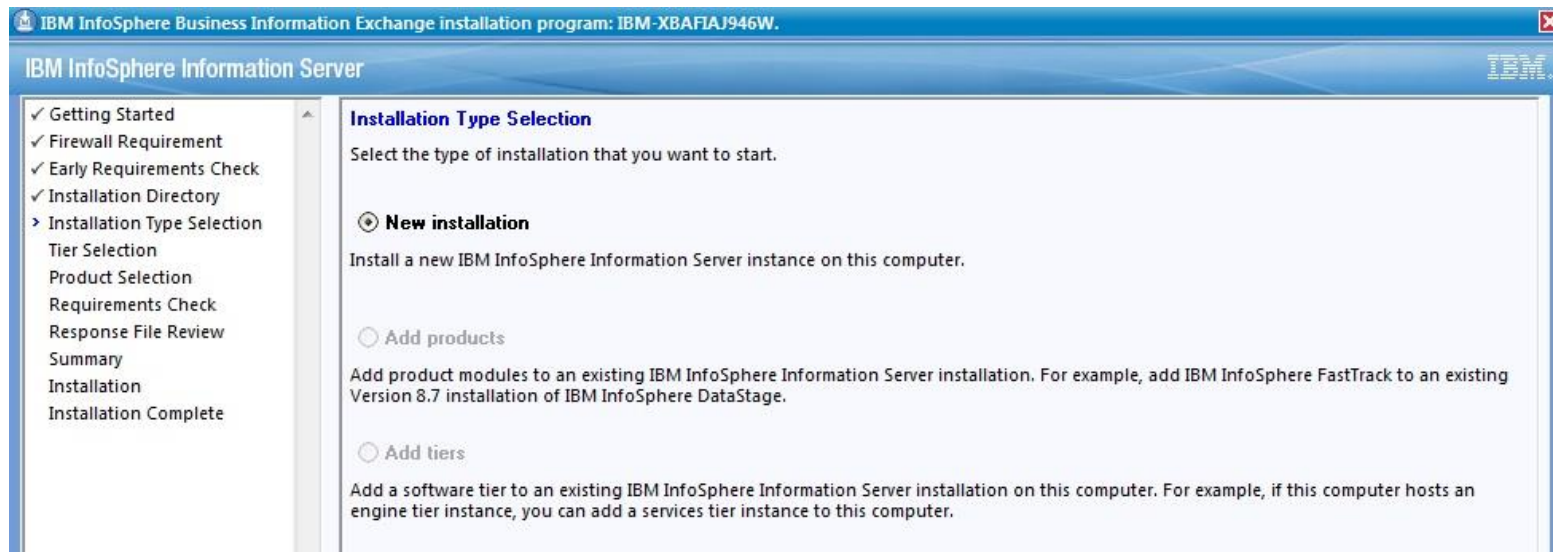

```
C:\DownloadDirector\InfoSph_v1.1_BIE_Win64\is-suite\setup.exe
INFO: Installation program will be running in this session, please do not close
installation window until installation program completes.
Installation program started at 10/17/12 1:01 PM

=====> Enter one of the following URLs to your web browser to begin the install
ation process:
http://IBM-XBAFIAJ946W:8080/ISInstall
https://IBM-XBAFIAJ946W:8443/ISInstall
```

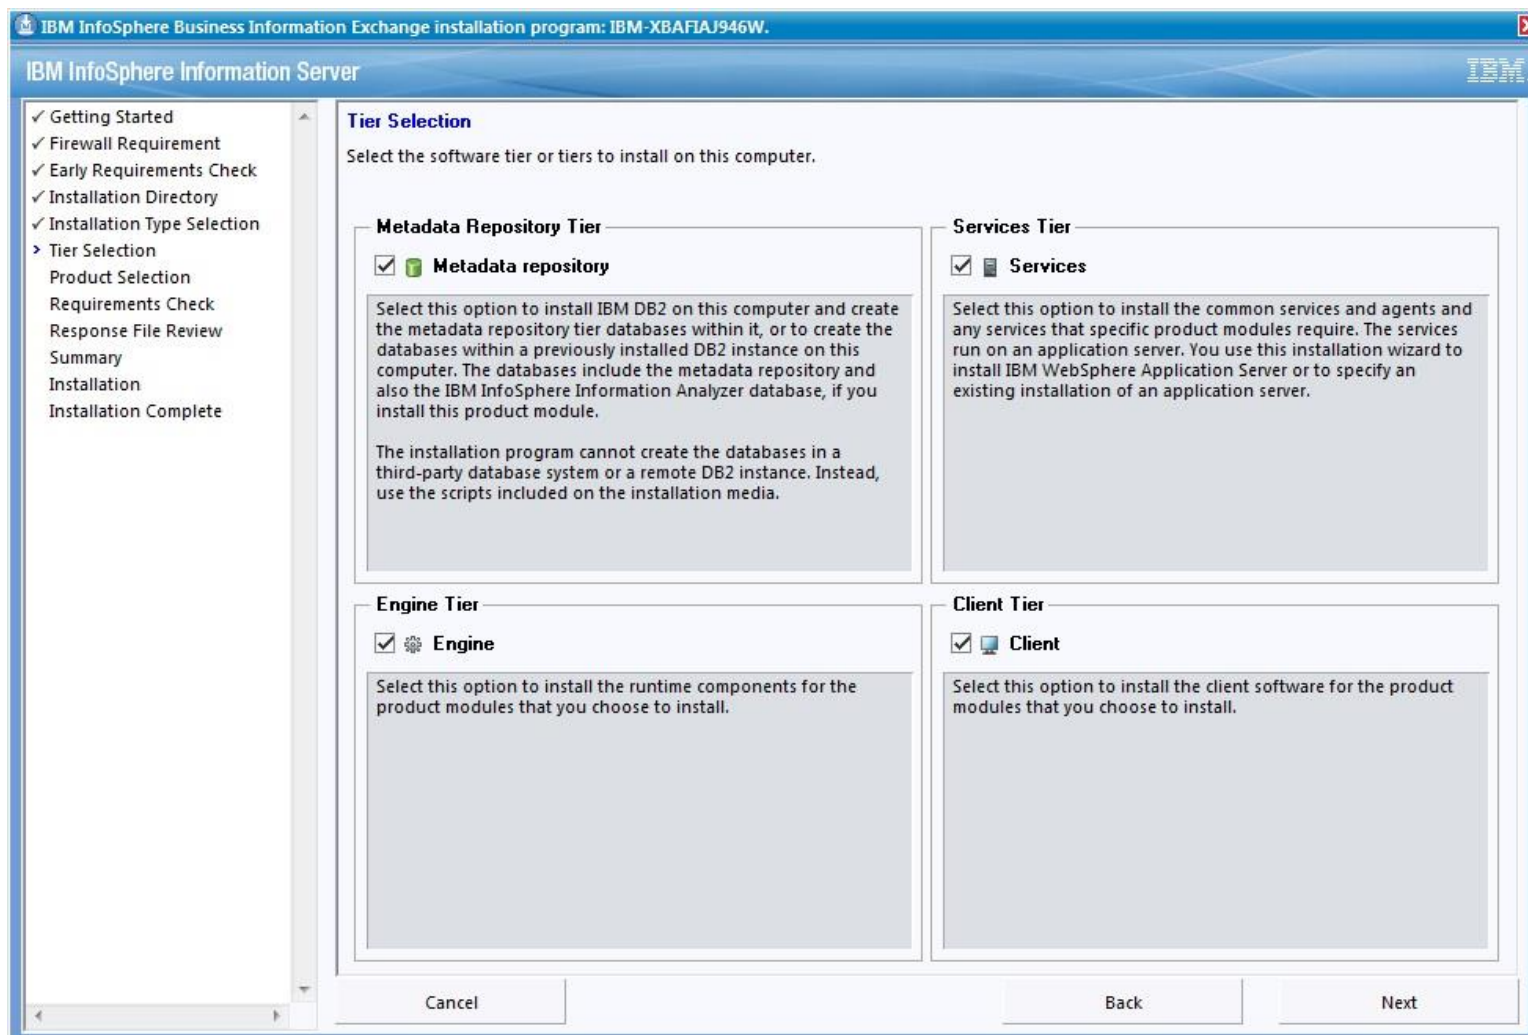

IS – DataStage Installation

- Specify installation type
 - New installation
 - Addition of a product module to an existing installation
- Addition of a software tier to an existing installation

IS – DataStage Installation

- Specify software tiers to install on this computer

Lab 01: Verify Information Server Services
